

Tree Maintenance Tips

- Keep hardscape material out of your tree and shrub well
- Reapply mulch to tree and shrub wells as needed
- Make sure emitters are properly placed and are adequately saturating the root zone
- Make sure each plant has the correct # of and correct gallons per hour emitters. (Adjustable heads can benefit trees, to canopy edge)
- After 6 months of planting, widen wells, mulch and fertilize with 10-10-10 (Arizona's Best brand)
- Check stakes for stability, can remove after a year or two
- Inspect for signs of pests, disease, or fungus
- After 6 months to a year begin to assess trimming and pruning needs
- Consider a periodic consultation to assess management needs. Call 928-772-0878
